Demo #11 - Handin Template (More Fire with Firebase)

☑ ~~Please "Make a copy" of this google doc file for yourself.~~
☑ ~~Please name the file: *lastname_firstname_demo11.pdf*~~

Today we created 4 different collections of data using different methods. You can do your own data source too, if you like.
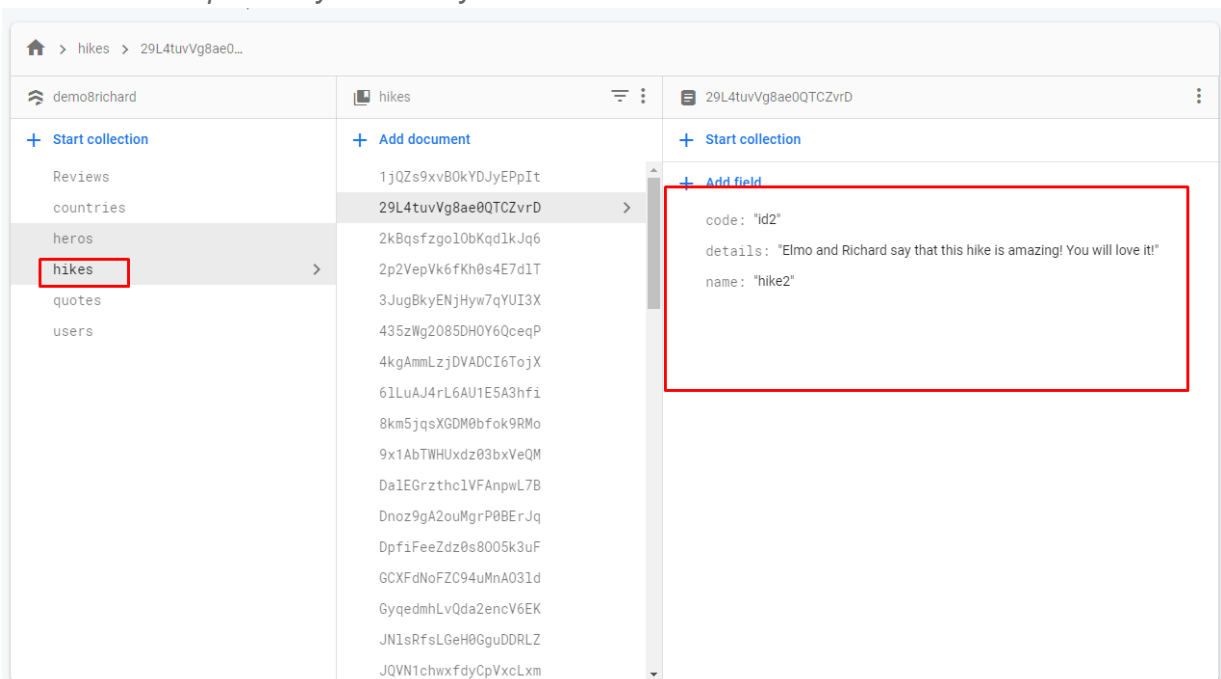

Each box below should include:
- one image of Firestore (Annotate "collection name", document "name" field, "details" field.)
- one image of your gallery page (Annotate "name" and "details" on the card.)
- Ps. make sure your own name is in the "details" string, somehow :)

Screen Capture #1:

What method did you use to get your data? *I'm using a for loop to generate data*
Where is the data from? *From the for loop iterator i*

Paste screen capture of Firestore here below:

*Paste screen capture of your Gallery here below:*

Screen Capture #2:

What method did you use to get your data? Reading from CSV
Where is the data from? *From CSV file (excel / online)*

Paste screen capture of Firestore here below:

Paste screen capture of your Gallery here below:
